Enterprise intelligence, built for momentum.

DESIGN SYSTEM

iCoreSprint

Enterprise ERP and consulting brand for iCoreSprint Technologies, serving multi-branch organisations in Egypt and the GCC. This brand book covers color, typography, spacing, radius, shadow and the primitive components extracted and built from the live marketing site at icoresprint.com.

An automated fetch of the site was blocked at the network level, so this system was reverse-engineered from four full-page screenshots instead. Every color is sampled pixel-by-pixel and is an exact match to the live site; type sizes, spacing and the typeface itself are close visual estimates rather than confirmed CSS values — see the notes on each page.
